il grado 7 si ottiene con una piastra antitrapano o con un adeguata protezione inglobata nella porta stessa.  
*Grade 7 is achieved with a drill-proof plate or a suitable guard built into the door itself.*

La classe 7 est obtenue grâce à une plaque anti-perçage ou à un dispositif de protection approprié intégré à la porte elle-même.

Güteklasse 7 wird mit einer aufbohrsicheren Platte oder einem geeigneten, in die Tür selbst eingebauten Schutz erreicht.

El grado 7 se consigue con una placa antitaladro o una protección adecuada integrada en la propia puerta.
